Available online only

Condition: New

Informacje:

Modern device for **dry baths in CO₂**, fully automated treatment; effective and fast **sealing of treatment chamber**, automated **refilling of CO₂** and circulation of gas inside treatment chamber, automated **humidification of CO₂**, gas temperature adjustment from **30°C to 40°C**; mobile bed construction, regulated position of head support.

Product description:

CARBObed is modern device for "dry" baths in carbon dioxide.

Advantages of dry baths in CO₂ in comparison to traditional hydrotherapy baths

- treatments are possible without undressing the patient
- much lower gas usage
- shortening of treatment preparation time (no filling and emptying of the bathtub)
- easier installation (no water supply installation is needed)
- more effective therapy for chosen applications

CARBObed characteristics

- fully automated treatment
- effective and fast sealing of treatment chamber
- automated refilling of CO₂ and circulation of gas inside treatment chamber allows stable and high gas concentration in treatment area.
- automated humidation of CO₂ increases efficiency of treatment since the start
- gas temperature may be regulated from 30°C to 40°C (+/- 1°)
- sound signal after end of treatment
- controlled piping away of CO₂ after end of treatment
- usage of CO₂: 18l / min. average
- mobile bed construction
- regulated position of head support
- dimensions (longitude x width x height) 2150 x 700 x 980 mm
- height of laying level: 590mm
- power supply 230V/50Hz 800VA

Applications of gas baths in CO₂

- rheumatic diseases
- circulatory system illnesses
- circulation disturbances of peripheral arterial vessels
- burns and frostbites
- hypo- and hypertonia
- ulceration of shank
- gangrene: diabetic, arteriosclerotic, angiospastic
